Art Unit: 2614

1. The abstract of the disclosure is objected to because it is identical to that of parent patent # 5,642,153. The Abstract of the inventive concept in this divisional application should diverge from (though not necessarily be dissimilar to) the parent patent. Correction is required. See MPEP § 608.01(b).

2. Claims 6-16 are objected to because of the following informalities: the phrase "*channel to service*" recited in both independent claims 6 and 12 should be hyphenated (as is presented in Fig. 5a(1)); and the phrase "*that including*" following "*segment map block*", should probably be changed to *--that includes--or just --including--* .

Appropriate correction is required.

3. Claims 6-16 nonetheless appear allowable over the prior art because the prior art does not discloses or suggest specifically identifying a channel-to-service map block (and its included information) as data in an program guide packet stream, as is claimed.
